New features in TESSY v5.0

Linux support

TESSY is now available also for Linux platforms, starting with Ubuntu 20.04. Legacy versions will not be supported officially.

Further Linux distributions will be supported successively on demand.

Linux compiler/target environments

Initially, the Linux version of TESSY will support the GNU/GCC compiler and Eclipse debugger and the following compiler/target environments:

- ARM V6 / ARM Development Studio
- ARM V6 / DS-5
- Green Hills ARM / Green Hills MULTI
- Green Hills ARM / LAUTERBACH TRACE32
- Linaro GNU ARM / ARM Development Studio
- Linaro GNU ARM / DS-5

Further compiler/target environments that are available on Linux will be supported successively on demand.
